IOWA FLOOD CENTER

DEVELOPING PRACTICAL TOOLS FOR COMMUNITIES

Witold F. Krajewski & Larry J. Weber, University of Iowa

What analysis and tools can communities use to reduce impacts of floods of the future? The speakers summarize events that led to establishment of the Iowa Flood Center following the June 2008 floods in Eastern Iowa. They discuss the scope of research, educational and outreach activities undertaken by the Center. Research activities focus on flood inundation mapping, developing flood prediction methods, and instrumentation relevant to flood monitoring.
